

CRS Business Systems

ARC International choose CRS for their first UK store

August 2011

ARC International has chosen CRS Business Systems as its EPOS provider for its new UK stores.

Trading under the name *The Well Laid Table Limited* they will be selling direct to the public and trade through their new retail outlets for the first time in the UK.

ARC International contains household names such as Luminarc and Pyrex, as well as commercial favourites such as Chef & Sommelier and Arcoroc.

CRS have supplied ARC International with Partnertech PT6215 All-in-One terminals with CRS Touch Point of Sale application software pre-configured with ARC Internationals extensive product database.

CRS Touch was the perfect solution for the stores allowing the operator to sell any product using its alphanumeric stock code or search for the item using the description search function. Another major benefit of CRS Touch was its built-in reports suite, which allow store managers to export sales data directly into their excel based stock package – negating the need for any additional software packages in store.

For more information on how CRS could help your business please contact us at info@crs-epos.co.uk or call on 01472 503222/01522 824555.
