CRS TOUCH

CRS Touch is the Touchscreen Point of Sale application that has been designed to suit the requirements of the Retail, Hospitality and Charity sectors.

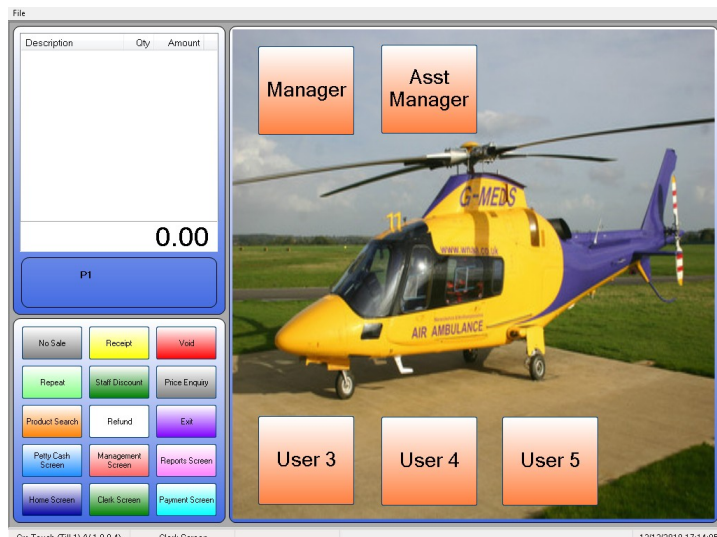

The application is scalable and can easily be configured to operate in a Stand Alone environment or as part of a Multi-Branch operation, making it an ideal choice for an expanding organisation.

* Images show example function panel and sales window

All of the screens within **CRS Touch** are fully configurable by the user and consist of three parts, a variable size Sales Window which shows the current sales and total, a variable size Function Panel which contains regularly-used functions and a large Sales Area (two thirds of the total screen) that contains any sales buttons or functions that are required.

Each button or screen background can contain a graphical image and/or text to make the recognition of products or functions easier (and therefore reduce training time). Additionally each button or screen can be assigned a security level to give total control over who can use certain areas of the software.

- Main Features -

Configurable to your requirements

Easy-to-use sales interface

Designed for Touchscreen so all buttons are large and bold

Multiple operator sign-on options

Barcode scanning capabilities

Graphical screens and buttons for easy recognition of products

Excellent sales promotion facility

Links seamlessly to CRS Touch Office to give full stock control

Links seamlessly to CRS Gift Aid packages - ideal for Charities

Utilises Microsoft SQL Server for Database Management

CAS TOUCH

There are multiple options for selling goods using CAS Touch, with "Hot-Shot" product keys, Code Entry, Barcode Scanning and Product Search facility (with large on-screen buttons that negate the need for a separate keyboard) - all available as standard.

Reporting on CAS Touch has been split into two types, daily reporting where buttons are preset on screen for regular reports such as "X" Reports or End of Day "Z" Reports and periodic reporting where a start and end date are input followed by the style of report required.

All reporting can be put under Management control and for "End of Day" reports is the option of putting Cash Declaration (blind declaration) into the terminal to show any "Unders" or "Overs" on the End of Day Report.

For Charities or Museums & Attractions with Charity Status the Gift Aid module that allows the user to easily sign up and capture a donor's details with no additional paperwork to fill out, may be of interest. By automating this process time and money is saved as well as improving your Gift Aid conversion rate.
